

Ajax Resources – executive interview

In this interview, [Ajax Resources](#) CEO Ippolito Cattaneo discusses Macacha's anticipated Environmental Impact Assessment approval, Reveille and the company's Euronext Growth Oslo exchange listing. He also covers recent developments at Pereira Velho and how he intends to maintain Ajax's rapid growth profile.

Ajax Resources acquires and develops assets with historical production, unexploited reserves and exploration upside. Its flagship asset is the Pereira Velho gold project in Brazil, which it acquired earlier this year from Appian Capital Advisory (one of the world's largest, specialist mining funds).
